

1)Screenshot showing that the installation of Visual Studio opens, and can run a program that contains a single call to `Console.WriteLine` on the system

The screenshot shows the Visual Studio IDE with a single file named `Program.cs` open. The code in the file is as follows:

```
1 // See https://aka.ms/new-console-template for more information
2 Console.WriteLine("Hello, World!");
3
4
```

2)SplashKit

### 3) NUnit tests
